# Desmond

FOR EVERY INDUSTRIAL REQUIREMENT  
FOR SCHOOLS AND HOME WORKSHOP

Throughout the past several hundred years vises have been a basic tool for man's progress and today Desmond-Simplex leads the way with improved design and production methods. The vise shown in this photograph is of German origin, hand made in the 17th Century. Note how the handle works from the back jaw, requiring the user to remove and replace handle for each revolution of main screw.

# Simplex

The contemporary design of Desmond-Simplex Vises offers ease of operation, economy, and accuracy never before available in history.

The Desmond-Simplex vise line is a quality line throughout and offers a complete selection of types and sizes. Many extra features and fine details of construction give these vises extra values at no premium in price. Stocked, serviced, and represented by selected Industrial Distributors. Specify Desmond-Simplex with confidence.

EXCLUSIVE DESMOND-SIMPLEX

## STEEL SLIDES

MILLED FROM SOLID STEEL...

Only Desmond-Simplex vises have steel slides. All heavy duty models have slides milled from solid bar stock steel; this assures extra strength and greater capacities.

The photographs show the progress of a solid bar of steel through the milling operations to the complete assembly consisting of front jaw cast on steel slide.

The bar is first cut to proper length then milled to provide an opening for the main vise screw and nut to be positioned in the slide. Holes are then drilled and a pin inserted in the end of the slide to insure that the slide and the front jaw are an integral assembly. Milling furnishes a slide with the proper size and shape. Desmond-Simplex steel slides are unbendable—unbreakable—ready for the toughest jobs.

# GREATER STRENGTH **CAPACITY-VALUE**

GREATER STRENGTH — CAPACITY — VALUE

### DESMOND SWIVEL BASE.

(Above) Extra heavy swivel base, full 360° swivel with positive lock. Base machined on bottom surface for accurate fit to bench. Heavy base lugs for secure mounting. Number "43" models and larger have twin base locks.

### OUTSIDE ADJUSTABLE MAIN SCREW RETAINER.

(Below) Outside removable screw retainer enables user to remove the main screw for lubrication. Also allows adjustment of any end play in screw.

### DESMOND MAIN VISE NUT.

(Above) A new type nut with longer threaded portion. Two-point support surface prevents nut from binding screw under stress. Nut is easily replaceable.

### STEP-MILLED, EASILY REPLACEABLE, JAW INSERTS.

(Below) Manufactured from special steel, carefully oil hardened with deep diamond serrations. Smooth jaw faces are available. Inserts are step milled to fit on milled shoulder of vise body and are held in place by countersunk screws. A close fitting drive pin prevents strain on screws from side blows. Will not shear from vise from either top or side blows.

### MACHINED VISE BODY.

Each Desmond-Simplex heavy duty vise has the back jaw broached. This operation (shown below) insures accurate fit and alignment of the steel slide in the back jaw as shown at the right. Initial accuracy prevents binding or distortion and thus smooth vise operation, even under severe usage, is maintained.

### DESMOND-SIMPLEX ONE-PIECE NON-PINCHING TYPE HANDLE.

(Right) One-piece handles have ends formed from shank steel. No separate ends to pinch or loosen. Handles are smoothly finished, designed for comfortable gripping and shaped to prevent pinched fingers.

# MACHINISTS

STATIONARY BASE

The long heavy base horn gives added support to the vise body thus giving extra rigidity to the vise mounting on the bench.

The stationary base type offers greatest stability for pounding and bending operations.

WISE NO.	JAW WIDTH	JAW OPENING	WEIGHT LBS.
31-P	3-1/4"	5"	21
33-P	3-3/4"	5-1/2"	30

43-P	4-3/4"	7"	60
51-P	5-1/4"	8"	70
61-P	6-1/4"	10-1/2"	127
81-P	8-1/4"	14"	231

# MACHINISTS

SWIVEL BASE

The extra heavy base allows convenient positioning of these vises—yet retains the strength of the stationary base models. The base may be swiveled a full 360°. A positive locking device secures the vise at desired position. Number 43-S and larger models have double base locks.

WISE NO.	JAW WIDTH	JAW OPENING	WEIGHT LBS.
31-S	3-1/4"	5"	25
33-S	3-3/4"	5-1/2"	35

61-S	6-1/4"	10-1/2"	145
81-S	8-1/4"	14"	250

GREATER STRENGTH — CAPACITY — VALUE

# MACHINISTS

SWIVEL JAW—SWIVEL BASE

These models are designed for tool room use and particularly for holding tapered or irregularly shaped pieces. Gripping surface of back jaw swivels to hold irregularly shaped work, or may be locked parallel to the front jaw by means of a tapered pin.

VICE NO.	JAW WIDTH	JAW OPENING	WEIGHT LBS.
33-SJ	3-3/4"	5-1/2"	36
41-SJ	4-1/4"	6-1/2"	52
43-SJ	4-3/4"	7"	71

# COMBINATION

BENCH AND PIPE

The strength of the exclusive steel slide is an important feature in the construction of the combination pipe vise. Due to the greater depth of the vise jaws and consequent strain imposed on the slide, the Desmond-Simplex steel slide vise offers the only complete assurance of an unbreakable slide.

Pipe jaws are accurately milled from high grade tool steel, properly hardened and designed to grip round bars or pipe starting at  $\frac{1}{8}$ " pipe diameter.

The full capacity of these extra deep jaws can be used without removing the pipe jaw inserts. The combination bench and pipe vise is ideally suited to marine applications, oil fields, construction jobs, and other uses which require a bench vise as well as pipe vise.

WISE NO.	JAW WIDTH	HOLDS PIPE	WEIGHT LBS.
33-CP	3-3/4"	1/8"—2-1/2"	44
43-CP	4-3/4"	1/8"—4"	80
61-CP	6"	1/8"—6"	168

GREATER STRENGTH — CAPACITY — VALUE

# SHEET METAL

OR PATTERN MAKERS

The greater depth of jaw and slide length enables this vise to grip extra wide and deep work. The jaws have smooth hardened steel inserts 2" in depth. Total jaw depth 6½".

These large, smooth jaws provide a secure grip on sheet metal or wood without marring. The extra jaw opening provides capacity for large work.

VICE NO.	JAW WIDTH	JAW OPENING	WEIGHT LBS.
42-CPS	4-1/2"	11"	70

# FILERS

SWIVEL BASE

High arched jaws permit easy access to work. Jaw inserts are hardened steel, with either smooth or serrated surfaces. (Regularly furnished with serrated surfaces.)

The filers vise is designed for all filing or production operations where easy access is desired to all sides of the work.

The double swivel model may be adjusted to both horizontal and perpendicular positions as listed for the positioning vises shown on page 15.

	WISE NO.	JAW WIDTH	JAW OPENING	WEIGHT LBS.
Swivel Base	41-FS	4-1/4"	6-1/2"	48
Double Swivel Base	41-FSW	4-1/4"	6-1/2"	55

GREATER STRENGTH — CAPACITY — VALUE

# HINGED PIPE

NEW TYPE LONG JAW FACES

Constructed of high grade malleable iron accurately machined. Frame may be reversed to open on either side of base and the frame hook is self-locking. New type, long jaw faces, machined from tool steel and oil tempered, assures gripping power without kinking or crushing pipe or tubing.

WISE NO.	CAPACITY	WEIGHT LBS.
12	1/8"-2"	8
12-1/2	1/8"-2-1/2"	11
13-1/2	1/8"-3-1/2"	18
14-1/2	1/8"-4-1/2"	26

# POSITIONING

DOUBLE SWIVEL TYPE

A regular heavy duty machinists vise with double swivel. Will rotate a full 360° in a horizontal and perpendicular plane. This makes possible a wide variety of positions for production assembly work, welding, and general repair applications.

These vises can be quickly modified to a regular swivel base machinists vise.

WISE NO.	JAW WIDTH	JAW OPENING	WEIGHT LBS.

# DRILL PRESS & MILLING MACHINE

HEAVY DUTY

This drill press and milling machine vise will meet the requirements for rugged, heavy duty use in either milling or drilling applications.

These vises have exclusive hardened steel plates covering the work surface to prevent holes from being drilled into the vise body.

Four extra heavy flanges are provided for fastening vise to table. Two slots are milled into the bottom of the base for key way alignment. Main screw operates in easily replaceable threaded bushing. Jaw faces are hardened and accurately ground, available in off-set as well as straight jaw faces. Off-set faces are illustrated. Handle is one-piece non-pinching type. Overall length 17". This vise is available in either regular semi-steel or solid steel.

	WISE NO.	JAW WIDTH	JAW OPENING	JAW DEPTH	WEIGHT LBS.
Cast semi-steel	6-DP	6"	6"	2-1/2"	55
Solid steel	6-DPS	6"	6"	2-1/2"	56

# DRILL PRESS & MILLING MACHINE

MEDIUM DUTY

This low priced drill press and milling machine vise is strongly and accurately constructed for long service.

Four extra heavy flanges are provided for fastening vise to table. Two slots are milled into the bottom of the base for key way alignment. Main screw operates in a replaceable threaded bushing. Movable jaw has "V" slot for holding round pieces.

One-piece handle with non-pinching type ends. Overall length is 12-1/2".

WISE NO.	JAW WIDTH	JAW OPENING	JAW DEPTH	WEIGHT LBS.
3-1/2-DP	3-1/2"	4-1/2"	1-11/16"	16

# WOODWORKERS

QUICK ACTING OR CONTINUOUS SCREW

Heavy duty woodworking vise for all applications, with accurately ground jaw faces, tops and sides. Easy and rugged mounting provision. Guide rods are full  $\frac{7}{8}$ " diameter with extra strong tie bar for perfect alignment and smooth operation of movable jaw. Handle of selected hard wood with large, easy to grip, round knob ends. Jaws ground with slight incline to top edges for firm gripping of thin material.

Available with quick acting or continuous operating screw and with or without adjustable steel dog in front jaw.

For use in factory production, schools, training institutes and for home and farm applications.

	WISE NO.	JAW SIZE	JAW OPENING	WEIGHT LBS.
Quick acting type with dog in front jaw	W-7	4" x 7"	9"	30
	W-10	4" x 10"	12"	33
Continuous screw without dog in front jaw	W-7-C	4" x 7"	9"	27
	W-10-C	4" x 10"	12"	34

# WOODWORKERS

STEEL HANDLE—CONTINUOUS SCREW

Steel handle models have all of the Desmond-Simplex features described for the wood handle models on the preceding page. For heavy duty use. Steel handles have right angle grips to permit quick spinning of vise screw for movement of front jaw. A spring brake, in handle head, holds handle for most convenient spinning position. Available with or without adjustable steel dog in front jaw.

	WISE NO.	JAW SIZE	JAW OPENING	WEIGHT LBS.
Adjustable steel handle without dog in front jaw	W-7-CS	4" x 7"	9"	27
	W-10-CS	4" x 10"	12"	34
Adjustable steel handle with dog in front jaw	W-7-CDS	4" x 7"	9"	28
	W-10-CDS	4" x 10"	12"	35

## ECONOMY MODEL—CONTINUOUS SCREW

This smaller size vise, strongly constructed and accurately machined, is designed for general duty use in home work shops. Jaw faces, tops, and sides are ground. Has steel dog in front jaw. Continuous action screw. Hardwood handle.

WISE NO.	JAW SIZE	JAW OPENING	WEIGHT LBS.
W-6-C	3" x 6"	7"	10-1/2

GREATER STRENGTH — CAPACITY — VALUE

# UTILITY VISES...

ECONOMY-PRICED

The Desmond-Simplex Utility Vise is a basic multi-purpose tool. Used as a "partner" with many hand and power tools.

All four sizes combine a swivel base, pipe vise, anvil and inverted chisel in one basic tool. Attractive design, rugged construction, and ability to withstand rough usage make them life-time investments for safe, accurate, and convenient shop work.

The four sizes suit all needs. No. 300 is primarily for model work and home use. No. 350 is for general home workshop use. Medium duty requirements in shop, garage and farm are met by Nos. 400 and 500, the latter providing extra jaw width and body strength.

# BASIC WORKSHOP TOOLS

FOR HOME AND SHOP

Only Desmond-Simplex Utility Vises offer such a wide range of features which contribute to strength, durability, and versatility.

1. *Steel Channel Slide.* Extra width and height of this type slide gives greater strength than small bar slide. It eliminates bent slides and damage to screw.
2. *Square Thread Steel Screw.* Protected by slide from dirt, chips and damage, insuring long wear.
3. *Hardened Steel Replaceable, Jaw Inserts.* All sizes have hardened steel, serrated jaws for maximum grip and service.
4. *Hardie or Cutoff Tool.* Anvil with horn—useful for hammering rings, hoops, etc.
5. *Pipe Jaws* are part of the vise; cannot be lost.
6. *Swivel Base* allows vise to turn in most convenient direction. Lock bolt holds vise securely.
7. *One-piece Handle, Non-pinching Type.* Ends welded into ball shape, no loose balls to fall off.

WISE NO.	JAW WIDTH	JAW OPENING	WEIGHT LBS.
300	3"	3-1/4"	12
350	3-1/2"	4-1/2"	18-1/2
400	4"	5"	25
500	5"	5"	30
